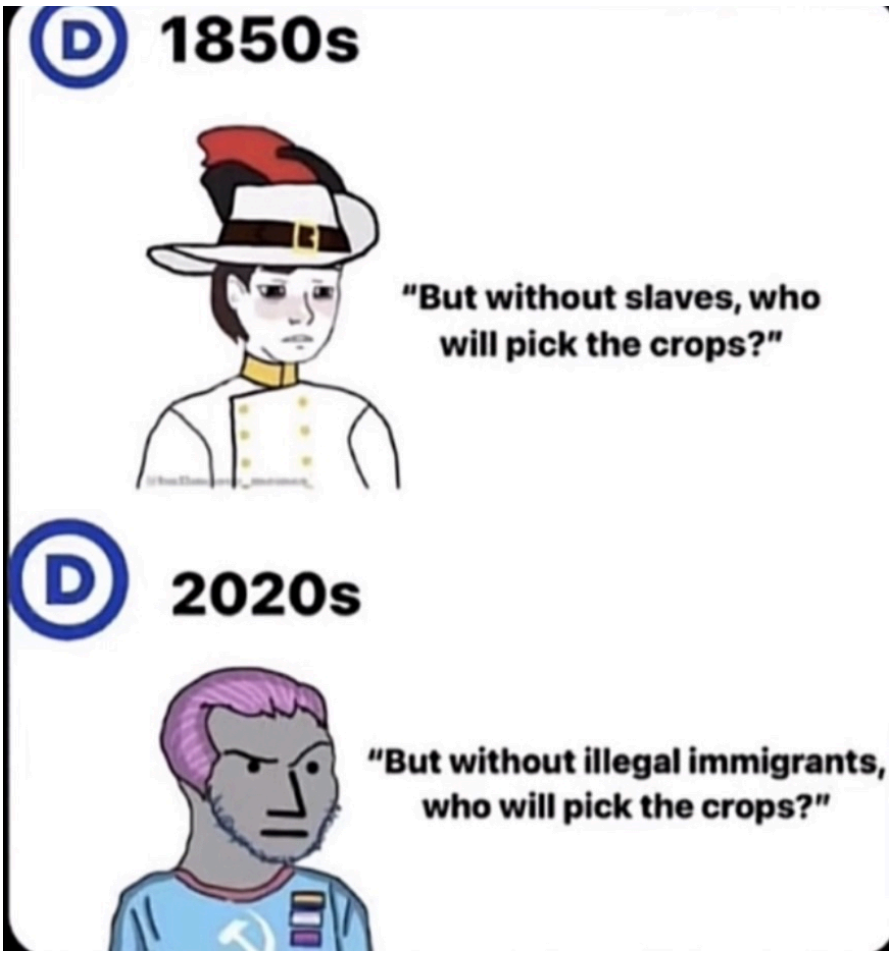
Ethcap Introduction into the theoretical basis of Ethcap's contributions to social studies and economics

This is merely an introduction to this system

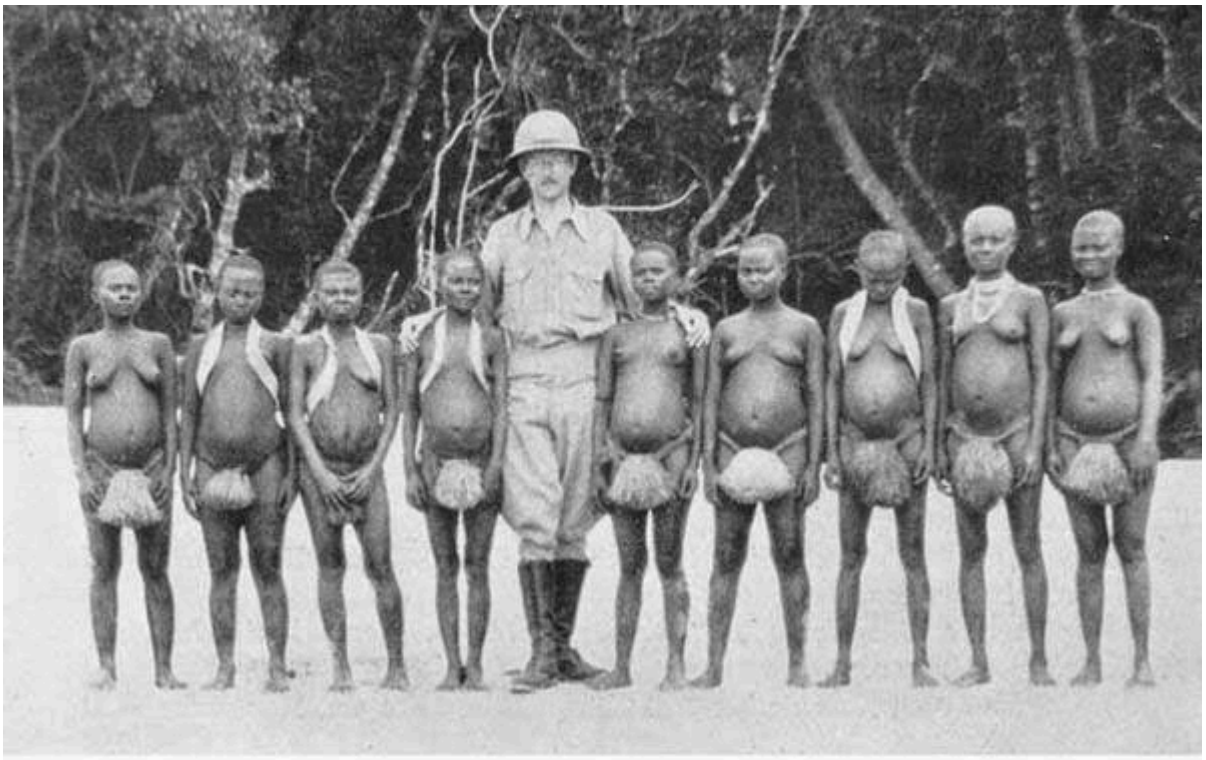
The current haunting situation in Europa is unprecedented to any historical event. The West has fallen, and the East will soon follow. The causes of this are simple. The fall of Nationalism, Capitalism and protection of heritage. The situation has reached a melting point and it has become clear. The left and right are becoming more radical everyday and we cannot let them have the upper hand. The left has destroyed Europa's framework so much that if a radical change in Europa's politics in the next few decades doesn't happen, Europa will fall out of the White majority's hands and fall into the hands of the Afrikans, muzzies and Jews. Capitalism has begun to favor the rich to a point of sustainability and Europa's heritage is at threat.

Ethcap operates in a productive capitalist framework that keeps the rich rich while strengthening the middle class to an equal level and a fair life. A system connected to the production of the worker creates a fair wage and the European Dream. A system connected directly to the labor of the worker ensures fair wages, rewards productivity and strengthens the economy of the nation. Ethcap protects Europa's culture and protects Europa's race, putting them first before immigrants. We prioritise Europa before others.



Nationalism is a key component to any right or far right movement ergo nationalism in the Ethcap movement. Nationalism means pride, superiority, protection and security for the majority population. This means firstly securing Europa's borders; The mediterranean sea, the Bosphorus strait and the Russian and Belarusian Border. Both Belarus and Russia are moving against Europa's ideals and shall not be kept in it. In a utopian state many far right movements would want all immigration to be stopped and a pure Europa but a rational person is aware this cannot be currently achieved, not in this state. Teaching the young pride in their heritage and 1§ one of the most vile things you can do is mixing with another race because you aren't even genetically the same. The LGBTQ and religion are complicated subjects and so many opinions exist but Ethcaps views on these are complicated. The LGBTQ exists and is able to exist because of the growing left

which is Ethcaps clear enemy. 2§ The LGBTQ enables the views which have killed Nationalism therefore an enemy of the movement. Religion is complicated. Ethcaps itself is not a religious movement however It is well aware that the culture Ethcap strives for and status quo is Christian culture. Europa would not be what it is today if not for Christianity and the Crusades defeating the muzzies. That is why Christianity is the most accepted religion but Ethcap does not discriminate against atheism or any religion that challenges the cultural status quo.



The current capitalist system has fallen to a bureaucratic mess that favors the rich. The left is like a broken clock, even able to be right twice a day. The elites are an issue but the left have an unrealistic utopian response which would destroy any nation. Ethcap has a simpler, more modest solution to the current state of capitalism. Producto capitalism, a system where the minimum wage is tied to the productivity of the nation. It will strengthen the middle class to a livable wage which most people can live comfortably at. It is a hard line to cross however with adjusting the minimum wage for smaller businesses and slowly bringing the minimum wage up to productivity to not create economic shock would protect jobs and stop mass lay offs.

A state which follows Ethcap cannot be democratic nor authoritarian. If the state goes democratic it cannot pass the laws needed for change however if authoritarian, it would fall in the following decades to a corrupt dictator. It would be a Hybrid/Authoritarian Model. There would be elections and freedoms that do not risk the status quo. Freedom of speech would be near to full freedom of speech. The elections would be controlled in a sense that anyone can be elected but they have to follow the idea of Ethcap or a similar system. The leader would have near total power however if the people believe he is abusing that power for himself and not the benefit of the people there would be a committee which has no political power in changing law but challenging the leader in hearings and votes if necessary from the people to vote the leader out. The elections would be every 5 years and there would be no term limit. A parliament would exist to discuss issues and bring them to the leader. However it wouldn't have enough power to run the country but fix issues among the common people which do not require the leader's attention. There would be extremely monitored small

lobbying allowed to avoid a corrupt government like in America which has lost control of its own government to AIPAC.

An Ethcap Europa would need to militarise at a rate which doesn't kill the economy but puts seriousness that the state is at risk of invasion and the ability of being able to challenge other powers. A united Ethcap Europa could challenge or dominate the world and become the ruling power of Earth. Military-Civil Fusion would be used to not overly spend on the military while still advancing at a consistent rate like China.

The European race is at risk as mentioned before because the mass migration from across the sea only started being at risk because of the radical left which has made people stop valuing their race and seeing each other as equals. A society which sees its blood as equal or worthless cannot compete and falls. This moves the idiotic mass to pacifism and then democracy. This change which is actively happening in Europa will cause the end of our system and the whites being genocided by the Afrikans and muzzies. 3§ If you look at any major city in western Europa you can see that it is dirty and dangerous, there is one common fact among all of these. Mass migration workers who do not integrate and cause trouble for the state. These would be subdued and forced out. However as civilisation's become more modern the birth rate falls as having a baby becomes expensive which would be helped with pro natalist policies and women's main job becoming a mother. Having a career is important but the birth rate needs to increase or we face extinction.

The European race is superior in many qualities compared to any other race. 4§ We are safer to be around, 5§ we are better at building modern societies, 6§ we are intellectually superior to most only behind the north asians and aztec jews. 7§ We have and are the most influential race. 10§ We are not the same as the other races, just as there are sub species of tigers there are sub species of humans.

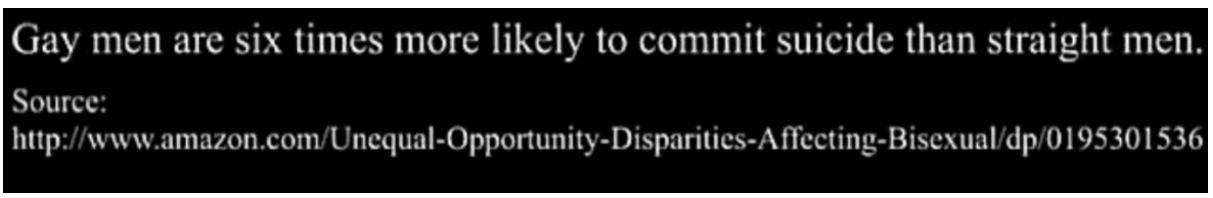
Foreign relations are vital to the existence of an Ethcap Europa. Russia and Belarus are currently an enemy as they are constantly challenging the majority of Europa but if they change so can our opinions. America would be an adversary. An Ethcap Europa would need to as mentioned quickly militarize to protect its borders and be able to challenge the American dominance. However, as with Russia, if America follows, so can our opinion. China is a direct threat to this system and an enemy till they switch to a proper capitalistic system. Israel is an enemy, possibly our greatest foe. They created the LGBTQ, 8§ they created the abortion pill, 9§ they created transgenderism. BUT, as long as they kill muzzies we can be tolerant of them but they will never be allowed to interfere with our politics and culture. However if they ever stop killing the muzzies, Israel will be considered an enemy of the state.



Gay men are six times more likely to commit suicide than straight men.

Presenting the Ethcaps resultant goal

The resultant goal of Ethcap is to stop the fall of Europa. In a more defined way to stop the left from destroying our culture, nationalism and bringing socialism to Europa.

Core Objectives:

- **Preserving European Culture**

-We need to protect the roots of Europa's culture which begins at protecting Christian culture.

-Teaching the new generations about their heritage and not being scared of being proud.

-Stopping left oriented parties and movements from alienating White cultural heritage as to not despise that which has served us immensely in the pursuit of (generation lasting) satisfaction of the collective and inner self.

- **Nationalistic Revival**

-Secure the Sea's and Bosporus strait from illegals able to cross.

-Rejecting Ideologies which are self killing and want to kill Europa
-Europeans come first

- **Weaken the Left**

-Replace bureaucracy with a strong leader with control stopping corruption as best as it can with the committee and people voting against the leader.

-Oppose socialist policies that weaken economic vitality and individual initiative.

-Hybrid democracy will remove a chance for the left ever able to get a footing with an educated generation.

-Left leaning politics shall be discussed and explored nonetheless to illustrate their dangers and historical relevance during the course of contemporary historical development

- Revive Capitalism

-Tying minimum wage to the productivity of the average worker.

-The minimum wage scaling based on the earnings of a company.

-The elite weakened but not eliminated, removing a lot of tax revenue. While the middle class is strengthened.

Adaptation of Ethcap into the modern societies

To integrate Ethcap into a modern capitalist society there would be needed changes to every left adaptation of our current system. The economic changes would come first to stabilize capitalism and as Europeans change so will the policies on the Non Europeans

Here below are some policies focused on in an Ethcap society

1.01 All illegal immigration and mass migration would be stopped.

1.02 All refugees and asylum seekers not from the Ukrainian conflict or any future European conflict would be moved to their home country or any other who would accept them.

1.03 Immigrants would either come as business Immigrants or integration Immigrants. If they come for business they will agree to not make babies and have a family with a European individual however if they come as an integration immigrant they go

through an integration process with tests and essays on European history and then decide per case if they can have children.

1.04 A maximum of a 10% immigrant population of the European population would be allowed, anyone after would be denied.

1.05 Pro-Natalist policies would support parenthood however it would already be much easier to have children with the much higher pay.

1.06 European's Come First; In any issue in the country on what to do in an economic situation, the primary goal would be to benefit the majority European population.

1.07 Radical changes in school education. Subjects like history will not only focus on the Holocaust but also on the other massacres like Holodomor, and the important Crusades will all be taught. Theses subjects are avoided currently partially due to the jewish influence on avoiding to discuss the mass christian genocide caused by the Judeo Bolsheviks.

1.08 Producto Capitalism would tie minimum wage to the nation's productivity and company earnings. This needs to be reached firstly to secure the economy of the nation. Slowly raise the minimum wage till you reach productivity and keep it there.

1.09 Military-Civil Fusion would build a strong military without killing the economy.

1.10 A hybrid government would be set up with a leader and elections every 5 years.

1.11 You can say anything you want but that does not mean the state supports it. If you choose to be gay and with a partner the

state will not stop you however it will not let you adopt, if you are trans the state will not supply testosterone or estrogen. If you choose to be a muslim you won't be punished but don't expect any government funding mosques.

1.12 Urban cleanup programs would remove crime and filth from cities caused by non-integrated migrants.

1.13 Taxes would be lowered for European families and businesses, but higher for foreign companies and non-integrated immigrants.

1.14 Marriage laws would prioritize European couples and traditional families.

1.15 Men aged from 18-30 need to do basic training in any military branch and serve for at least 1 year in their specified specialty. Creating a militarised society ready to fight for Europa's goal.

1.16 Healthcare would prioritize Europeans and focus on family health.

1.17 Foreign aid would be cut unless it directly helps Europa's interests.

1.18 Land ownership would be prioritised for European citizens however integrated Immigrants can also buy land.

1.19 Integrated migrants ought to bring a cultural gift for educational purposes and as a sign of respect from their country of their origin, as fu further enhance scientific inquiry and to metaphorically serve as a greeting. Europe shall then in turn award the newly incorporated citizen with a gift of their own, as to show equal respect, that shall be practical for their daily life as to

suggest their upcoming life in the fertile lands of greenery and sight to greedy ones pupils on.

1.20 European culture ought to be upheld and examined, its existence shouldn't be reduced to a narrow and dogmatic outlook from only one perspective. This would keep public debates ongoing, yet all debaters and researchers ought to keep a sense of pride in their heritage which shall motivate them in their journey to scientific contribution.

1.21 Religion ought to be tolerated and its beneficial components serving to both a man of faith and to that of “earthness” ought to be spread along as many territory as possible

1.22 Ethcap can only become democratic once it becomes what today's capitalist parties have. Total control while having “democratic” votes.

Realising the potential weaknesses of Ethcap to be addressed

Ethcap is a bold ideology that isn't perfect as no real ideology in practice can be perfect. Humans are naturally greedy and that is why communism cannot succeed and why capitalism is turning to favour the rich. There are flaws and complications in effectively putting Ethcap into practice. There are 4 main pillars of issues, the economy, the racial construct of Europa, the left and authoritarian rule.

Firstly, to apply Ethcap into most European economies you need to drastically raise the minimum wage to match productivity. This would most times cause a drastic economic shock and en masse layoffs. There are a few ways to mitigate this but nothing comes free in this world. You can combat this with only slowly raising the minimum wage till it reaches that productivity to prevent a shock. Minimum wage being lower for smaller businesses to protect smaller businesses from collapsing, with the minimum wage scaling by the yearly revenue. Unfortunately even with these stopgaps to combat the problems of raising minimum wage there will still be lay offs.

Secondly, Europa is being actively flooded with non-Europeans and an Ethcap takeover will be harder and harder. They will not be easily convinced of this ideology and they may attempt to resist or even worse revolt.

Thirdly, the left is growing just like the right, meaning they will try to stop us, they will try to vote us out. It is an issue that every

ideology has an enemy. However if it goes to a war we will win, we have the young and middle aged men and they have less of them for a shooting war.
Lastly, any ideology that has any sort of authoritarian rule has the real risk of corruption and takeover. As mentioned there would be the committee and parliament to try to minimize the risk as much as possible but it will just have to be a problem that cannot be stopped without turning to democracy which would not be any better.

Miscegenation: A Severe Health Risk For White Females

The media tells us that smoking is hazardous to our health, but miscegenation, especially white female/black male pairings, is glamorous.

Femicide & AIDS are the leading causes of premature death for young black women. White women who date blacks assume the same, or even higher, risk factors.

According to the July 2003 issue of the American Journal of Public Health, white females married to black males are 12.4 times more likely to be murdered by their husbands than white females married to white males. The same study shows that white men married to black women are 21.4 times more likely to be murdered by their wife than white men married to white women. The study shows that white women married to black men have the single highest risk of death by femicide of any married women in the US.

Myth #6: "There isn't significant genetic distance between races"

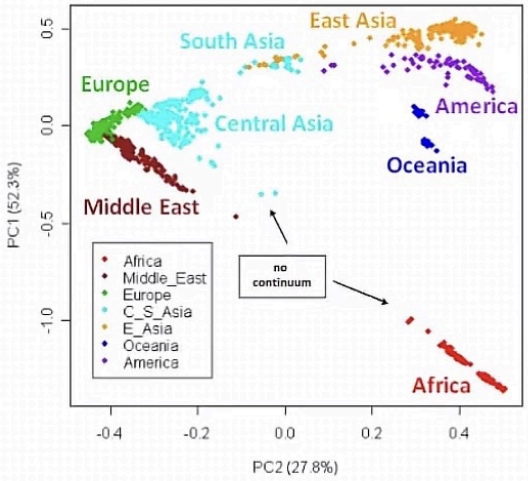
Fact: If we used the same standards of taxonomic classification we use for animal, Homo sapiens would have a number of subspecies.

Africans are cleanly separated from the rest of mankind and the genetic distance between Eurasians and Africans is higher than the distance between many subspecies of animals.

Species	Genetic diversity (^)	Recognized subspecies
Humans	~0.7	0
Jaguars	~0.7	9
Chimpanzees	~0.7	4
Leopards	~0.6	8
Pumas	~0.5	6
Elk	~0.4	7

^ Heterozygosity

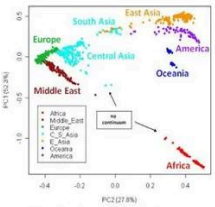
Woodley, Michael. "Is Homo sapiens polytypic? Human taxonomic diversity and its implications." School of Biological Sciences, University of London. Medical Hypotheses 74 (2010) 195–201.



Li JZ et al. "Worldwide human relationships inferred from genome-wide patterns of variation." Science. 2008 Feb 22;319(5866):1100-4.

THE TRUTH ABOUT RACE

Myth #1: "Race has no biological basis"



Li JZ et al. "Worldwide human relationships inferred from genome-wide patterns of variation." Science. 2008 Feb 22;319(5866):1100-4.

Fact: There are very accurate ways to determine someone's ancestry based on DNA such as principal component analysis.

When you sample many individuals across the globe and map them, you notice an overall clustering pattern where you can identify populations and races.

This clustering is a natural consequence of divergent evolution due to geographical isolation and differing environmental pressures that Homo sapiens encountered since migrations took place.

Africans are consistently separated from the rest and this is due to the fact that they have been evolving separately for more than 40,000 years and unlike the rest, they don't have any Neanderthal admixture.

Myth #2: "Race is a social construct"

RACIAL GROUPINGS MATCH GENETIC PROFILES, STANFORD STUDY FINDS

STANFORD - Checking a box next to a racial/ethnic category gives several pieces of information about a person, but a new study suggests that those checkboxes may also reveal a lot more, perhaps something about their risk of different diseases. But a new study by researchers at the Stanford University School of Medicine finds that the checked box also says something about a person's genetic background.

This work comes on the heels of several contradictory studies about the genetic basis of race. Some found that race is a social construct with no genetic basis while others suggested that clear genetic differences exist between people of different races.

What makes the current study published in the February issue of the American Journal of Human Genetics, more conclusive is its size. The study is by far the largest, consisting of 3,636 people who fell into four racial categories: white, black, Asian and Native American. The study found that only two individuals had DNA that matched an ethnic group different than the box they checked at the beginning of the study. That's an error rate of 0.14 percent.

According to Neil Risch, PhD, a UCSF professor who led the study while he was professor of genetics at Stanford, the findings are particularly surprising given that people in both African-American and Hispanic ethnic groups often have a mixed background. "We might expect those individuals to cross several different genetic clusters," Risch said. This is especially true for African-Americans, who have a high degree of admixture with European ancestry. But that's not what the study found. Instead, each self-identified racial/ethnic group clustered into the same genetic cluster.

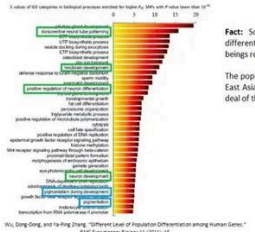
The people in this research were all part of a study on the genetics of hypertension, recruited at 15 locations within the United States and in Taiwan. This broad distribution is important because it means that the results are representative of racial/ethnic groups throughout the United States rather than a small region that might not reflect the population nationwide.

Fact: Even loose racial groupings such as Hispanics match genetic profiles with high accuracy while Africans, Europeans and East Asians match genetic profiles with perfect accuracy.

Even if a hypothetical continuum existed, it wouldn't imply equality. If that was the case, since the point where yellow turns into orange and the point where orange turns into red are arbitrary social constructs, then yellow and red are the same color.

Tang, Hua et al. "Genetic Structure, Self-Identified Race/Ethnicity, and Confounding in Case-Control Association Studies." American Journal of Human Genetics 76.2 (2005): 268–275.

Myth #3: "Race is only skin-deep"



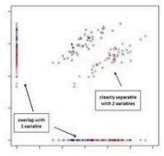
Wu, Dong-Dong, and Ya-Ping Zhang. "Different Level of Population Differentiation among Human Genes." BMC Evolutionary Biology 11 (2011): 16.

Fact: Scientists have studied the level of genetic differentiation among different populations of human beings regarding different biological processes.

The populations studied were Africans, Europeans and East Asians and the nervous system accounts for a big deal of the variation, even more so than pigmentation.

Myth #4: "Races have more variation within them than between them"

a.k.a Lewontin's fallacy



Witherspoon, D. J. et al. "Genetic Similarities Within and Between Human Populations." Genetics 176.1 (2007): 351–359.

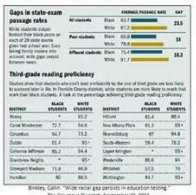
Fact: The statement is only true when examining the frequency of different alleles between individuals at an individual locus and that's why it's called Lewontin's fallacy.

When scientists analyze geographically distinct populations such as Europeans, Africans and East Asians and measure genetic similarity over many thousands of loci, the results are entirely different.

The results instead show that individuals from one population are never more similar to individuals from different populations than to individuals from their own.

Myth #5: "Racial differences in intelligence are explained by socio-economic factors"

Fact: Multiple studies across several decades show that even when you account for income, parenting and other factors, the gap between blacks and whites persists at all levels.



Gaps in state-exam passage rates

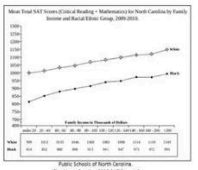
		AVERAGE PASSAGE RATE	GAP
White students outperformed their black peers in each of 29 state exams given last school year. Even among family income into account, the gap persisted between races.	All students	Black 62.1	23.5
		White 81.2	
	Poor students	Black 69.8	15
		White 79.8	
	Affluent students	Black 75.4	16.3
		White 91.7	

Third-grade reading proficiency

States show that students who can't read proficiently by the end of third grade are less likely to succeed later in life. In Florida Gravity districts, white students are more likely to reach that mark than black students. A look at the percentage achieving third-grade reading proficiency:

DISTRICT	BLACK STUDENTS	WHITE STUDENTS	DISTRICT	BLACK STUDENTS	WHITE STUDENTS
Bailey	*	83.2	Hilliard	61.4	88.4
Coral Winchester	72.7	94.6	New Albany-Plain	81.3	95+
Columbus	54.7	73.2	Reynoldsburg	87	94.8
Dublin	82.4	95+	South-Western	59.4	79.2
Gahanna-Jefferson	85.2	94.4	Upper Arlington	*	95+
Grandview Heights	*	95+	Westerville	80.8	94
Groveport Madison	71.9	86.9	Whitehall	57.5	70
Hamilton	80	88.5	Worthington	84.7	95+

Binkley, Collin. "Wide racial gap persists in education testing." The Columbus Dispatch. September 22, 2013.



Mean Total SAT Scores (Critical Reading + Mathematics) for North Carolina by Family Income and Racial/Ethnic Group, 2009-2010.
White
Black
Family Income in Thousands of Dollars
Value
Rank

Public Schools of North Carolina. "The North Carolina 2010 SAT Report."

At All Family Income Levels, There is a Persisting Racial Gap in SAT Scores

Family Income	Mean Black Score	Mean White Score	Racial Gap
Under $20,000	798	978	180
$20,000 to $40,000	836	995	159
$40,000 to $60,000	864	1017	153
$60,000 to $80,000	889	1032	143
$80,000 to $100,000	908	1052	144
$100,000 to $120,000	922	1066	144
$120,000 to $140,000	926	1073	147
$140,000 to $160,000	942	1087	145
$160,000 to $200,000	943	1091	148
More than $200,000	981	1130	149

"Family Income Differences Explain Only a Small Part of the SAT Racial Scoring Gap." The Journal of Blacks in Higher Education. January 22, 2009.

Table 2: Mean SAT Mathematics and Verbal Scores by Family Income for the 2003 College Bound Cohort

Family Income	Black Test-takers Math Score	Black Test-takers Verbal Score	White Test-takers Math Score	White Test-takers Verbal Score
Less than $10,000	382	381	478	488
$10,000 to $15,000	395	396	478	481
$15,000 to $20,000	400	405	485	488
$20,000 to $25,000	409	413	493	495
$25,000 to $30,000	411	419	495	497
$30,000 to $35,000	419	426	502	504
$35,000 to $40,000	422	430	504	505
$40,000 to $50,000	431	438	510	510
$50,000 to $60,000	441	450	516	514
$60,000 to $70,000	440	450	521	519
$70,000 to $80,000	448	457	528	524
$80,000 to $100,000	461	468	539	534
More than $100,000	490	495	568	557

Jensen, Arthur. "The g Factor: The Science of Mental Ability." Praeger, 1998.

Kansas City Experiment.

"In 1985 a federal district judge took partial control over the troubled Kansas City, Missouri, School District (KCMSD) on the grounds that it was an unconstitutionally segregated district with dilapidated facilities and poor academic performance. To bring the district into line and into compliance with his liberal interpretation of federal law, the judge ordered the state and district to spend nearly $2 billion over the next 12 years to build new schools, integrate classrooms, and bring student test scores up to national norms."

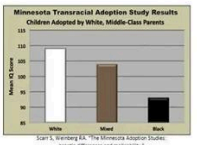
The judicial branch ordered the legislative branch to spend money, and told it exactly how to do it.

"Kansas City spent as much as $11,700 per pupil - more money per pupil, on a cost of living adjusted basis, than any other of the 200 largest districts in the country. The money bought higher teachers' salaries, 15 new schools, and such amenities as an Olympic-sized swimming pool with an underwater viewing room, television and animation studios, a robotics lab, a 25-acre wildlife sanctuary, a zoo, a model United Nations with simultaneous translation capability, and field trips to the Bahamas and Senegal. The student-teacher ratio was 12 or 13 to 1, the lowest of any major school district in the country."

How did that turn out?

"The results were dismal. Test scores did not rise; the black-white gap did not diminish; and there was less, not greater, integration."

Cato, Paul. "Money And School Performance: Lessons from the Kansas City Desegregation Experiment". Cato Policy Analysis No. 298.



Scarr S, Weinberg RA. "The Minnesota Adoption Studies: genetic differences and malleability." Child Development. 1983;54(2):260–267.

Myth #6: "There isn't significant genetic distance between races"

Fact: If we used the same standards of taxonomic classification we use for animals, Homo sapiens would have a number of subspecies.

Africans are cleanly separated from the rest of mankind and the genetic distance between Eurasians and Africans is higher than the distance between many subspecies of animals.

Species	Genetic diversity (*)	Recognized subspecies
Humans	~0.7	0
Jaguars	~0.7	9
Chimpanzees	~0.7	4
Leopards	~0.6	8
Pumas	~0.5	6
Elk	~0.4	7

* Heterozygosity

Xing J, Watkins WS, Shlien A, et al. Toward a more Uniform Sampling of Human Genetic Diversity: A Survey of Worldwide Populations by High-density Genotyping. Genomics.

Myth #7: "There isn't qualitative genetic evidence for racial differences"

Fact: Multiple studies have pinpointed the genetical differences between Europeans, Africans and East Asians. The differences often relate to genes involved in neuronal processes, cognitive ability and the nervous system.

rs236330 is a gene strongly expressed in neurons, including hippocampal neurons and developing brains, where it regulates neuronal morphology.

rs324050 is a gene involved in neuronal excitability, synaptic plasticity and feedback regulation of acetylcholine release.

East Asian populations (Japanese, Chinese) have the highest average frequency of beneficial alleles (59%), followed by Europeans (55.5%) and sub-Saharan Africans (19.4%).

Piffer, Davide. "Factor Analysis of Population Allele Frequencies as a Simple, Novel Method of Detecting Signals of Recent Polygenic Selection: The Example of Educational Attainment and IQ."

The gene ASPM is a specific regulator of brain size, and its evolution in the lineage leading to Homo sapiens was driven by strong positive selection. Here, we show that one genetic variant of ASPM in humans arose recently, about 5800 years ago in Eurasia and has since swept to high frequency under strong positive selection.

Mekel-Bobrov N et al. "Ongoing adaptive evolution of ASPM, a brain size determinant in Homo sapiens." Science. 2005 Sep 9;309(5741):1720-2.

MCPH1, Chromosome 8. The alleles of this gene, commonly called "microcephalin," partly determine brain size and organization. A new allele of this gene that increases intelligence arose about 37,000 years ago. This allele is common in Eurasians but rare in Africans.

Wang, Y. & Su, B. (2004). "Molecular evolution of microcephalin, a gene determining human brain size." Human Molecular Genetics, 13(11): 1131-1137.

rs9320913 (A), rs3793606 (C), rs4024939 (T), rs13188378 (G), rs11584700 (G), rs4851266 (T), rs2054125 (T), rs9227 (C), rs4075894 (A) and rs12640020 (A) are genes associated with intelligence that vary across populations.

Piffer, Davide. "Factor Analysis of Population Allele Frequencies as a Simple, Novel Method of Detecting Signals of Recent Polygenic Selection: The Example of Educational Attainment and IQ."

IGST00083 ("expressed sequence tag") is an snDNA polymorphism found more often in high IQ groups. It is artificially common in Europe (less so in Asia), where it is associated with a lineage that dates back 35,000 years.

Thomas, M.G. et al. (1998). "Mitochondrial DNA and IQ in Europe." Intelligence, 26:167-171.

Following the world distribution of the major gene of intelligence (C2orf16 rs1191912), in Sub-Saharan Africa this gene is practically non-existent, as its carriers amount to 1-2% of the population whereas in many regions of Eurasia the gene can be found in almost 30% of the population.

Wassi, Volmar. "Racial Differences and the Probability of C2orf16 rs191912 to be the Major Gene Locus of General Cognitive Ability."

Single nucleotide polymorphism in the neuroplastin locus associates with cortical thickness and intellectual ability in adolescents.

Common variants at 6q22 and 17q21 associated with intracranial volume are more common among Eurasians.

Desrivières, S et al. "Single Nucleotide Polymorphism in the Neuroplastin Locus Associates with Cortical Thickness and Intellectual Ability in Adolescents." Molecular Psychiatry 20.2 (2015): 263–274.

MAPT ("microtubule-associated protein tau").
Chromosome 17. Mutations in this gene can cause neurodegenerative disorders. The H1 haplotype of this gene may have come from the Neanderthals. Physicist and mathematician Roger Penrose proposed that consciousness is a quantum effect that arises in these microtubules.

Hardy, J. et al. (2005). "Evidence suggesting that Homo neanderthalensis contributed the H2 MAPT haplotype to Homo sapiens." Biochem. Soc. Trans., 33:582-585.

Myth #8: "Individual successes disprove the relevance of race"

Table S2. Genetic African ancestry by socioeconomic status in African Americans in the ARIC and JHS studies (n = 5470).

Socioeconomic Status	No. (%)	African Ancestry, Median (IQR), %	P Value
Education level			
<Bachelor degree	1517 (27.7)	81.8 (74.0-87.5)	
>High school but <Bachelor degree	1226 (22.4)	84.2 (78.0-88.7)	<0.001
High school or GED	1121 (20.5)	84.6 (77.9-89.1)	
>High school	1606 (29.4)	86.2 (80.5-90.1)	
Family income			
Affluent	1127 (20.6)	81.8 (74.1-87.7)	
Upper middle	1350 (24.7)	84.0 (77.8-88.8)	<0.001
Lower middle	1244 (22.7)	85.2 (78.7-89.4)	
Low	1093 (20.0)	86.2 (79.9-90.0)	
Occupation			
Management	1577 (17.7)	82.5 (75.1-87.9)	
Sales	777 (11.2)	83.2 (76.7-88.4)	
Service	1458 (28.1)	83.6 (79.7-89.7)	<0.001
Farming/production	729 (11.3)	84.9 (78.7-89.1)	
Operators/construction	668 (20.6)	85.7 (79.5-90.0)	
Homemaker	263 (11.1)	85.8 (77.5-88.4)	

Ching-Yu Cheng. "African Ancestry and Its Correlation to Type 2 Diabetes in African Americans: A Genetic Admixture Analysis in Three U.S. Population Cohorts."

Fact: Scientific studies show European admixture is an excellent predictor of how successful a black person is.
